

# FINAL DETAILS ABOUT MIDTERM EXAMS

Midterm exams may take many different forms, depending upon the class content. Exams are January 17 & 18, and then January 22 & 23.

Seniors with a cumulative average of a 90% or higher in a first semester half-credit course are eligible for exam exemption. Speak to your teachers for details!

Exams are 90 minutes long. Students must remain in the classroom until the end of the exam block. Students are not dismissed as they finish.

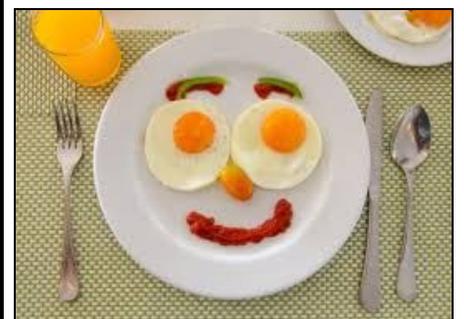

## HOW DO I PREPARE?

- 1** Be sure you have the review sheet and/or any materials for the exam that your teacher handed out. Sometimes a teacher might give you a story, article, or problem set to look at in advance. Be sure you have what you need.
- 2** Organize your binder or notebook, and clean out your locker or backpack. Put loose papers, tests, quizzes, or assignments back in their proper place with the rest of your work from that class. Throw away junk!
- 3** Complete the exam schedule on the back of this page. Fill in the names of your classes in the appropriate boxes. Figure out the order of your exams, and make a schedule for when to study for which classes.
- 4** If there are any “take-home” components of your exam (read a story or article, create an outline, complete a problem set, prepare a presentation or performance, etc.), get them done! Follow the directions. Pay attention to details.
- 5** Actually study. Follow the schedule you made in #3. Review notes, quizzes, and tests from the course. Make flash cards with vocabulary or review sheet terms. Make plans to stay after with a teacher or get together with classmates for a review session.

## DURING EXAM WEEK:

1. Get a good night's sleep.

2. Eat a good breakfast.

3. Bring your supplies.
